Question / Problem:

With PROCESS DIRECTOR for AP version 7.4, an incompatibility was introduced in the XML Import functionality that causes a short dump when the function module /RSE/US_XML_IMPORT calls the function CHECK_FI_OR_MM_DOCUMENT. This correction implements code to make the FI/MM determination in a different manner such that it is compatible both with PDAP 7.4 and earlier versions.

Answer / Solution:

There is a correction (3.6-002) for this issue.

Enter How to here:

1. Contact Kofax support to receive the correction for this issue.
