What firewall rules need to be in place to allow the Desktop Automation Service to work?

3018541

**Question / Problem:**

What firewall rules need to be in place to allow the Desktop Automation Service to work?

**Answer / Solution:**

Before RPA 10.6 it was ok to create firewall rules which allow the communication based on the `node.exe` executable.

Starting with RPA 10.6 we require that the ports 49998 and 49999 (in the default configuration) are allowed inbound.

**Applies to:**

<table>
<thead>
<tr>
<th>Product</th>
<th>Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>RPA</td>
<td>10.6</td>
</tr>
</tbody>
</table>
