Kofax TotalAgility - How to configure Transformation Designer for HTTPS

Summary

13725

Update the Kofax Transformation Designer to use SDK SVC accessed via SSL by updating the connection within Kofax Transformation Designer options.

For Kofax Transformation Designer, you need to do the following for HTTPS communication:

- Make sure you have installed a certificate that is trusted by the client on the server.
- If the Transformation Designer server is installed on-premise but is not part of a domain, disable Windows Authentication for BasicHttpBinding_Service and WebHttpBinding_Service.

Specify the URL for Transformation Designer for HTTPS as follows:

- For Azure: https://<Azure host name>/Services/SDK
- For other configurations: https://<host name>/TotalAgility/Services/SDK

Keywords: Transformation, Designer, TD, HTTPS, SSL, Azure, KTA
