IPA - Access Denied when attempting to open an item from the work queue: Has Access Permission

Summary

20007

Applies To

- Invoice Processing Agility: 1.0 and higher

Behavior

- When trying to take an activity you receive the following message on the Validation Screen: "Access Denied. You must have at least HasAccess access permission on ModifyReadDocuments. If you need technical assistance, reference action: _DN_RefreshPermittedPayees."

Known Causes

- The resource does not have appropriate permissions

Resolution

- The current resource accessing IPA validation screen has not been assigned sufficient rights in the resource.
- Add the permission, Under Settings - Capture Permissions, ensure the user has the correct rights assigned.
