KTA 7 - How to install the legacy webservices in KTA v7.0.2 and later version

Summary

12241

Question

How to I install the legacy web services to use in KTA 7.0.2 and later versions after upgrading?

Answer

You first need to copy the contents of the following folder:
%root%\KofaxTotalAgility- 7.0.2\TotalAgility\TotalAgilityInstall\LegacyWebServices

This needs to be copied to the following folder while selecting to merge folders:
%root%\C:\Program Files\Kofax\TotalAgility\Agility.Server.Web

Keywords: LegacyWebServices, Agility.Server.Web
