Cannot make backup/export project on Kapow RPA v10.5 with Tomcat and Oracle12c

3020039

Question / Problem:
We have switched the database from SQL server to Oracle.
After that, we get error when we try to perform backup or export project on our Management Console.

Answer / Solution:
Under certain circumstances, data stored in the database becomes NULL, and that interferes with the ability to draw a backup from the system.
This bug has been fixed on Kofax RPA version 10.6 or later.

Applies to:

<table>
<thead>
<tr>
<th>Product</th>
<th>Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>RPA</td>
<td>10.5</td>
</tr>
</tbody>
