RPA/DTS - Sentiment project: Failed to create NLP process: No language has been specified

3020645

Question / Problem:

When I run the sample Sentiment project which is delivered with RPA/DTS, then I receive the following error message:

How can this problem be solved?

Answer / Solution:

This issue is seen if no language is selected for Natural Language Processing on class level in DTS/KTM.

https://knowledge.kofax.com/Robotic_Process_Automation/Troubleshooting/RPA%2FDTS_-_Sentiment_project%3A_Fai...
If no language can be selected, then it is necessary to install the NLP Language Bundles.

They can be found on https://delivery.kofax.com in the RPA Package.
