Problem:
By default, the maximum number of activities displayed in the Workqueue is 50.
How can this limit be increased?

Solution:
The limit is set in TotalAgility.

In Kofax TotalAgility Designer (assuming version 7.7), navigate to:
System -> System Settings -> Process -> SLA and work assignment

In the "Work Queues" section, adjust the value for "Max rows to return".

Applies to:

<table>
<thead>
<tr>
<th>Product</th>
<th>Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accounts Payable Agility</td>
<td>2.2</td>
</tr>
</tbody>
</table>
