Kofax TotalAgility - Support for OAuth 2.0 and MS Graph

Kofax TotalAgility support for OAuth 2.0 and MS Graph in light of Microsoft's recent announcement to retire Basic Authentication based connections to Exchange Online. Microsoft has announced that on October 13th, 2020 they will stop supporting and retire Basic Authentication for Exchange ActiveSync (EAS), Post Office Protocol (POP), Internet Message Access Protocol (IMAP), and Remote PowerShell (RPS) in Exchange Online.

**Applies to**

Kofax TotalAgility v7.5.0.9 and above

**Resolution**

In response to this, Kofax TotalAgility can now support OAuth 2.0 and MS Graph from version v7.5.0.9 onwards.

*MS Graph has been added as a new import source in the Integration menu.*

*To configure MS Graph as an import source please refer to the [Online Help Documentation](https://knowledge.kofax.com/Smart_Process_Applications_-_TotalAgility/Configuration/Kofax_TotalAgility_-_Support_for_OA...)*
