Question / Problem:
I made a Logon Form. But when we tried to logon, we received error "This method call is not permitted".

Answer / Solution:
If you are trying to logon to the form without password, please follow below.

1. Go to Designer > System Settings > Settings and on the general tab look for "Disable Logon without password".
2. Enable the "Disable logon without password" setting.
3. Restart the services Core Worker, Streaming Service and the TotalAgility Application Pool in IIS.
4. Go back to the login screen and see if you're given the error message again.

Applies to:

<table>
<thead>
<tr>
<th>Product</th>
<th>Version</th>
</tr>
</thead>
<tbody>
<tr>
<td>KTA</td>
<td>7.x</td>
</tr>
</tbody>
</table>
