Scanner Configurator

The Scanner Configurator provides the ability to search for scanners which will work with Kofax products.

Overview

The Kofax Scanner Configurator lets you search for and review popular production scanner and MFP configurations for use with Kofax products. The Scanner Configurator also allows customers to search for legacy Kofax product information.

The following products have pre-configured reports available for easy access.

- Kofax Capture
- Kofax Front Office Server
- Kofax Express

Note: The Kofax Scanner Configurator includes information about legacy products that are not part of the current Kofax product line-up. If you have questions about compatibility with an older application, please contact your application vendor or Kofax for more information.
