IPA - Company does not exist in the company database table (EN051)

Applies To

- Invoice Processing Agility: 1.0 and higher

Behavior

- When export is performed on a document, the below error is seen:
  - Export failed: MyCompanyCode_0_URN.tif
    Company does not exist in the company database table (EN051): MyCompanyCode

Known Causes

- This export issue can be caused when the company code exported does not exist in the configured database.

Resolution

There are two ways to resolve this issue:

1. Using SCM, you can disable the Company Code from validating through database if the Company Code is not expected to perform a lookup to the Database.
2. Update the Company Code database to contain an entry for the Company Code from the error message.
