IPA - Invoice Processing Agility Project Field Settings within SCM (Solution Configuration Manager)

Applies To

- Invoice Processing Agility: 1.0 and higher

Clarification of "Default Value" and "Default If Nothing Extracted" columns in Field Settings of the IPA Project.

Default Value
If not null, the value of this column will be used to populate the corresponding field, irrespective of whether a value was determined during extraction.

Default If Nothing Extracted
If not null, the value of this column will be used to populate the corresponding field if the following are both true:
- No value was determined during extraction.
- The corresponding "Default Value" project field has no value (is null).
