ReadSoft - How to determine supplier portal document volume

Summary

Determine supplier portal document volume by using a table content search from SAP.

Article

1. Navigate to t-code SE11
2. Input table name /cockpit/thdr and click display
3. Click on the Contents button
4. If the origin field isn’t already listed as a field for selection, select it by navigating to Settings-> Fields for Selection
5. Once the origin is listed as a field for selection, enter “9” as the origin
6. Click on the Number of Entries button and the system will return the number of supplier portal documents
