How to get enhanced debug from the Desktop Automation Service.

Question / Problem:
Getting enhanced debug from the Desktop Automation Service.

Answer / Solution:

1. Open a command window on the DAS machine.

2. Navigate to C:\Program Files (x86)\Kofax RPA DesktopAutomation [release]\DesktopAutomationService\bin

3. Type node.exe -e "require('server')" and hit return. A port number will display.

4. Start the Desktop Automation Service normally.

5. Run your scenario and capture the DAS logs for review.
